Build with Gemini XPRIZE | Managed by Devpost | CONFIDENTIAL

LEGEND:

Personnel: \$0 - solo founder, no paid employees or contractors during hackathon period.

COGS Tokens: Gemini API costs for code security screening (~\$0.002/diff) and post-verdict failure forensics (~\$0.003/report). Active July-August when Gemini integration was built and tested against live mainnet runs.

SG&A Software Subscriptions: GCP Cloud Run hosting for mergegate-api service + verifier job (~\$10/month), Cloud Firestore (~\$3/month), Secret Manager (~\$2/month). May was partial month (\$5).

SG&A Tokens: USDC for Base mainnet testing - 2 escrow fundings (0.30 each), 2 settlements (0.25 each), 2 verifier fees (0.05 each), 1 x402 payment (0.05). Plus ETH gas for x402 relay.

Other Expenses: State incorporation filing for BlockIntel Inc (\$20 in June, shared with Verigate). Sealed VPC setup and Cloud Run Job configuration for sandbox isolation (\$10/month July-August).

All expenses recorded on cash basis.
